LAYER STRUCTURE

The PSD files are Easy to custom,
Well Layered and properly named.
The screen in the right side is the
Layer Structure:

This template using resolution
1920px width and height adjusting

Please note: Layers structure maybe
different each other depend on how
the design look.

HOW TO INSERT IMAGE INTO THE CLIPPING MASK?

You can easily drop your
image on top of Layer that
says "Placeholder". For
example, I drop Image at
the top of Image holder
(see the picture).

Then right-click on the
Image layer and choose
"Create Clipping Mask"

After the image placed in the placeholder, you should have the layer structure like this. See the red rounded sign in the image.
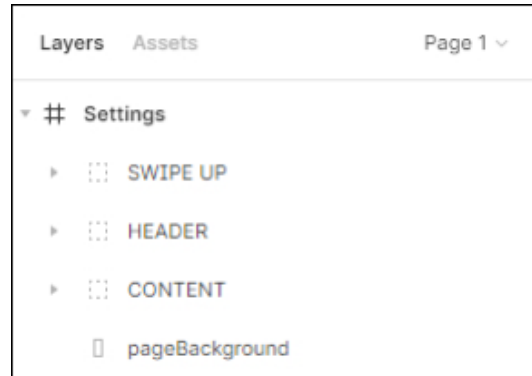

5) How to Edit Figma File

LAYER STRUCTURE

The Figma files are Easy to custom,
Well Layered and properly named.
The screen in the right side is the
Layer Structure:

This template using resolution
1920px width and height adjusting.

Please note: Layers structure maybe
different each other depend on how
the design look.

HOW TO INSERT IMAGE INTO THE CLIPPING MASK?

You can easily drop your
image on top of Layer that
says "Placeholder". For
example, I drop Image at
the top of Image holder
(see the picture).

Then right-click on the
Image layer and choose
"Use as Mask"

After the image placed in the placeholder, you should have the layer structure like this. See the red rounded sign in the image.

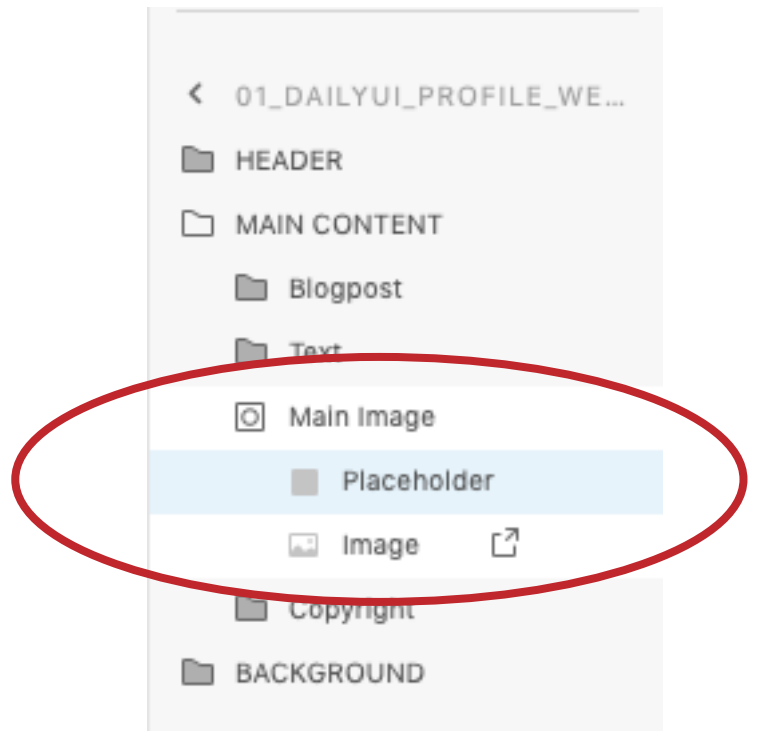

6) How to put image to the Sketch file

In the SKETCH version, there is a layer called 'Placeholder'. You can put your image above this layer and then your image will automatically clipped with the placeholder layer.

7) How to put image to the Adobe XD file

In the XD version, there is a layer called Main Image. You can open it and drag your image under the placeholder layer.
